ENOPALET

6.1, 8.3, 10.7, 15.3 hl special palletizable wine-making tanks

Enopalet is a palletizable tank that is a necessity in any wine cellar. It is specifically designed for small capacities and is very handy because it is used to store, transfer and ferment small masses of pressed grapes, must and wines. It can be provided with all possible and handy winemaking accessories. These tanks have large doors for removing the marc after fermentation, conditioning jackets, and all the other accessories used in modern winemaking such as thermometers, temperature probes, mobile or fixed washing plants, designed to mount nitrogen gas inertization systems and also able to use our famous polypropylene "Polifascia" multiple bands or stainless steel thermal bands or fixed TERMOSTAR heat-exchange jackets. Fixed or removable stirrers can be installed. We manufacture palletizable tanks tested to PED 1.3 - 3 - 6 bar for sparkling wines.

Stackable Enopalet tanks from 100 to 1500 litres in size

1000 liter insulated Enopalet tank with nitrogen gas system and 1000 liter "S" series Minitank
