

Destemmer/Crusher

Roto 10
Roto 20

- The ARMBRUSTER destemmer/crusher is very gentle on the grapes.
- A specially shaped, slow-rotating pin shaft ensures optimum distribution of the grapes in the destemming cylinder, reduces suspended solids content, and increases output and performance.
- The Roto 10 and Roto 20 stand for top-quality design, workmanship and material.
- Use of high-grade stainless steel or wear-free plastics guarantees long service life.

	Roto 10	Roto 20	Technical Data
Output , hand-picked grapes (metric tons/h)	Up to 10	Up to 20	<ul style="list-style-type: none"> - Continuously operating machine using the destemming/crushing principle - Self-supporting housing made from AISI 304 grade stainless steel - Destemming cylinder made from impact resistant PA plastics - Crushing rollers made from food-resistant plastics - Continuously variable gap width between crushing rollers
Pin shaft , constant or variable drive (with frequency converter)			
Drive power	1.5 kW	2.2 kW	
Destemming cylinder			
Rotation	CW and CCW	CW and CCW	
Diameter	340 mm	420 mm	
Drive power	0.37 kW	0.37 kW	
Crushing rollers			
Drive	Drum motors	Drum motors	
Drive power	2 x 0.35 kW	2 x 0.35 kW	
Weight	240 kg	285 kg
